

APPENDIX I.AD - Storm Water Discharges Associated with Industrial Activity from Non-Classified Facilities

A. Coverage of This Section.

1. Discharges Covered Under This Section. The requirements listed under this Part shall apply to storm water discharges from the following activities:

Table I.AD.1 – Sector AD: Non-Classified Facilities

Activity Code	Activity Represented
AD	All other stormwater discharges designated by the <i>Director</i> as needing a permit (see <i>UAC R317-8-11.3(1)(b)</i>) or any facility discharging stormwater associated with industrial activity not characterized by any of the industrial sectors discussed in <i>Appendix I.A</i> through <i>Appendix I.AC</i> . Facilities may not elect to be covered under Sector AD. Only the <i>Director</i> may assign a facility to Sector AD.

2. Sector Specific Limitations on Coverage. There are no additional limitations on coverage other than those listed in *Part I.C*, unless notified by the *Director*.
3. Sector Specific Prohibition of Non-Stormwater Discharges. There are no additional prohibited non-stormwater discharges beyond those in *Part I.D* of this permit, unless notified by the *Director*.

B. Sector Specific Control Measures and Effluent Limits.

There are no additional control measures and effluent limits beyond those in *Part III* of this permit, unless notified by the *Director*.

C. Sector Specific Inspection Requirements.

There are no additional inspection requirements beyond those in *Part IV.A* of this permit, unless notified by the *Director*.

D. Sector Specific Plan Requirements.

There are no additional Plan requirements beyond those in *Part VII.D* of this permit, unless notified by the *Director*.

E. Monitoring Requirements.

1. Analytical Benchmark Monitoring. There are no analytical benchmark monitoring parameters for Sector AD facilities in this permit, unless notified by the *Director*. Any additional monitoring and reporting requirements shall be based on the nature of activities at the facility and the facility stormwater discharges, in accordance with *Part V.D.2*.
2. Numeric Effluent Limitation Monitoring. There are no numeric effluent limitation parameters for Sector AD facilities in this permit, unless notified by the *Director*. Any additional monitoring and reporting requirements shall be based on the nature of activities at the facility and the facility stormwater discharges, in accordance with *Part V.D.2*.
