Salt Lake City, Utah 84116
tgribben@usmagnesium.com

Dear Mr. Gribben:

We are responding to your request for authorization through a Department of the Army (DA) permit for the proposed US Magnesium Inlet Canal project. The project involves the maintenance and extension of two existing canals in waters of the United States. The approximately 130-acre project site is located in Gilbert Bay of the Great Salt Lake, near Latitude 40.957838°, Longitude -112.605741°, Tooele County, Utah.

In our letter dated September 29, 2022, we requested additional information from you by October 29, 2022 to continue processing your request with this office. We appreciate your efforts to provide the requested information, including ongoing coordination with this office. However, because the necessary information has not yet been provided, your request for a DA permit has been administratively withdrawn. If you submit all of the requested information in the near future, we will consider completing our decision without having to restart the permit process. However, should the project involve significant changes or additional impacts to waters of the United States, a new public notice may be required.

Please refer to identification number SPK-2008-01773 in any correspondence concerning this project. If you have any questions, please contact me at the Bountiful Regulatory Office, 533 West 2600 South, Suite 150, Bountiful, Utah 84010, by email at Michael.A.Pectol@usace.army.mil, or telephone at (801) 295-8380 ext. 8315. For more information regarding our program, please visit our website at www.spk.usace.army.mil/Missions/Regulatory.aspx.

Sincerely,

Michael Pectol
Project Manager, NV-UT Section
