Jason and Mike,

This email is a follow-up to our meeting on December 13, 2022. Please see the attached letter requesting an extension of the reasonable period of time for the US Magnesium Canal Continuation Project (SPK-2008-01773) Section 401 Water Quality Certification. The DWQ is requesting up to 1 year, which would require the DWQ to act by September 1, 2023.

Please reach out with any questions.

Best,

Leanna Littler-Woolf

Leanna,

After coordinating with my leadership on this request, it has been determined that the Corps cannot further extend the reasonable period of time for this action for the following reasons:

1. The application for the US Magnesium Canal extension project has been administratively withdrawn by the Corps pending additional information from the applicant, and as such, the Corps does not have an active action in which to process the extension request;
2. Your request to extend for up to the 1-year maximum timeframe did not contain sufficient details for the Corps to make a determination if that entire timeframe would be necessary for your agency to make a final decision on the 401 request.

If the Corps receives the information requested from the applicant, we will reactivate and continue processing this action and will notify you of such permit application reactivation for your records.

Jason,

The DWQ appreciates the USACE's consideration in our request. We will be sure to issue a decision by December 29, 2022.

Best,

Leanna
