

**Wasatch Front Water Quality Council
and South Davis Sewer District
Request for Proposal – Expert on Air Deposition of Nutrients in Water**

The Wasatch Front Water Quality Council is requesting proposals for a technical expert relating to air deposition of nutrients in water systems. The expert candidate will have experience in researching and sampling for air deposition of nutrients and will be able to review sampling plans, air deposition research reports and air deposition white papers. The successful candidate will be required to write comments and reports, to assess current sampling plans and available information and will be required to advise on current research as requested and as directed by task orders.

To be considered for this contract, proposers shall submit the following information:

1. A current Curriculum Vitae (CV) including a summary of research,
2. A statement of availability for work and if needed ability to travel to Salt Lake City, Utah.
3. An all-inclusive rate for consulting work on an hourly basis including any overhead and equipment fees.
4. A statement of how travel expenses will be determined.
5. A statement of interest in the project work.

The above proposal should be no more than two pages excluding the CV and must be received by September 17, 2019. The proposal should be sent to the following electronically:

Leland Myers, P.E., Executive Director
Wasatch Front Water Quality Council
lelandmyers@gmail.com

The schedule for award is anticipated to be no later than September 20, 2019
